

ANALOG LAB TRAINER

MODEL- BBDM2001

This trainer has been designed with a view to study the Oscillators, Multivibrators, Generators, Integrators, Trigger and Wave Shaping Ckt Trainer and circuit application on breadboard.

SPECIFICATIONS

1. Built-in Power Supplies
DC Supply : 0 to 15V /200 mA Variable, + 5V, 200 mA, + 15V , 200mA, -15V, 200mA.
AC Supply : 0- 10- 15-20-25V AC, 200mA
2. Sine wave signal generator : frequency range of 1 KHz with 0 to 5 volts amplitude.
3. Built-in led indicators : 4 Bits
4. Potentiometers : 2 Nos.
5. Necessary standard components as plug-in elements to carry out the experiments are supplied along with kit
6. Instructional manual with circuit diagram and experimental manual is provided along the kit.
7. Standard Accessories : 1. A Instruction Manual
2. 2 mm Connecting jumpers: 10 Nos.
