

DIGITAL AND ANALOG BREAD BOARD TRAINER

MODEL - DIGIANA101

This trainer has been designed with a view to verify truth table of logic gates and address and to construct small Analog and digital circuits and perform various experiments.

SPECIFICATIONS

- | | | | |
|----|------------------------------|---|--|
| 1. | Breadboard provided | : | 1 strips - 175mm long with 640 tie points |
| 2. | Built in Power Supply | : | + 5 V, 1A. +/-15 V, 250mA Regulated Power supply |
| 3. | Clock generator-TTL | : | Variable from 0.1 Hz to 1 KHz. |
| 4. | Pulsar | : | 1 No. provided to apply pulses. |
| 5. | LED output level indicators | : | 8 Nos. |
| 6. | Logic input switches | : | 8 Nos. |
| 7. | Built in Sine wave Generator | : | |
| 8. | Standard Accessories | : | 1. Trainer Manual.
2. Connecting Wires. |
